South Tangerang

Software engineer with 4 years of experience in frontend and backend development, with strong exposure to IT support, application maintenance, and enterprise solutions across various industries. Experienced in building web applications using JavaScript and Java Spring. Currently expanding into DevOps and cloud engineering, with a focus on containerization, CI/CD, and cloud infrastructure to grow into a well-rounded fullstack and cloud-capable engineer.

Work Experiences

PT Solusi Kode Indonesia - **South Tangerang, Indonesia** Mar 2022 - Present

Software Engineer

- Developed, maintained, and enhanced frontend and backend application features using JavaScript, Wavemaker, and Java, including UI behavior, REST API integration, and performance improvements.
- Handled production issue investigation and resolution across frontend and backend layers, ensuring reliable system operation for 12+ active clients.
- Collaborated with cross-functional teams (QA, product, and engineers) to deliver enhancements aligned with business and technical requirements.

desktopIP Corporation - **South Jakarta, Indonesia** Jun 2020 - Nov 2020

ERP Consultant Intern

- Consulted with the client to gain insights into their business inquiries and needs.
- Assisted the internal team in creating the ERP system proposal.
- Worked with other interns to test the ERP system proposal and report any bugs to the internal team.
- Documented the proposal in form of manual, video, and presentation for the client's consideration

Education Level

Universitas Indonesia - **Depok, Indonesia** Sep 2017 - Jan 2022

Bachelor of Information Systems, 3.15/4.00
